Create/Edit Account(Template-Name)

Module Description

Account Screen based on a template

All accounts (extended) that you mark as templates (check 'use this account as template') can be used as templates for new accounts. The following fields will be taken into account:

- Tariff
- Location
- SSID
- Groups
- Account Data in English

This can be especially useful for accounts that are valid for certain locations and / or are also group members, because all selections made for the template will be set as defaults.
