- Group Module
- Create/Edit Account(Easy)
- Create/Edit Account(Template-Name)
- Create/Edit Account(Extended)

Account Module

Module Permission According to Roles (Sysadmin, Administrator and Assistant)

Module	Create	Edit	Show	Role
Account	YES	YES	YES	Sysadmin
	YES	YES	YES	Administrator
	YES	YES	YES	Assistant

Module Overview

- You can create hotspot users for different locations.

- You can search your hotspot users based on *Type*, *User name*, *Last name*, *Tariff* and *Online*.

Field	Description
Type	You can search by different types, Active : Only the online hotspot users. Inactive : Only the offline hotspot users. New : Only the new hotspot user's accounts which are not synchronized yet. All : All types of hotspot accounts Archived : Only the archived accounts. Templates : Accounts marked as templates.
User name	You can search by login name.
Last name	You can search by last name.
Tariff	You can search accounts based on your tariff.
Online	You can see the accounts which are online or offline or both.

> If one hotspot user uses multiple devices, then the time will be summarized for all devices.

- You can see the basic information about your hotspot users. The hotspot users can download their account information / surf behaviour, login data / bill in their preferred language and delete their account (Last column of the table).

- If you see a sandbox in the first column, this means that some changes have not yet been

completed.

- To enable an account you need to click on **amount** to mark it as **payed**. Some changes like a new location will be applied only for accounts with payed tariffs even if they are free of charge. To edit an account click on the **User name** (First column of the table). This option depends on the Tariff check box of Walled garden of location module (Create/Edit Location).

- There are two link buttons New Account (extended) and New Account (easy), below right corner of the screen which redirects to Create/Edit Account(Easy) and Create/Edit Account(Extended) respectively.
