- [Create/Edit Tariff](#)

Tariff Module

Module Permission According to Roles (Sysadmin, Administrator and Assistant)

Module	Create	Edit	Show	Role
Tariff	YES	YES	YES	Sysadmin
	YES	YES	YES	Administrator
	NO	NO	YES	Assistant

Module Overview

At least one tariff is required, but you may create as many tariffs as you need. Either allow unlimited access to the Internet or restrict it by any combination of runtime (Time Duration) and capacity (Amount Of Data) limits. It is your choice whether you offer free service or how much you charge. You may allow tariffs for certain locations only.

Table Column	Description
Tariff	The name of the tariff.
Runtime	How much time the hotspot users can use.
Capacity	How much data the hotspot users can use.
Price	How much money the hotspot users has to pay.
Location	For which location(s) the tariff is chosen for use.
