- Create/Edit Assistant

# User Module

## Module Permission According to Roles (Sysadmin, Administrator and Assistant)

| Module | Create | Edit | Show | Role |
|--------|--------|------|------|------|
| User | YES | YES | YES | Sysadmin |
| | YES | YES | YES | Administrator |
| | NO | YES (Only own password and language) | Only own infromation | Assistant |

## Module Overview

Administrator can give authorization to more than one person with the appropiate privilege (administrator / assistant), who will handle your frontend of hotspot solution. The administrator has full permission for using all functionalities and assistant has some limitations.

- You can create a user (Top right corner of the table) (Create/Edit Assistant). (Only administrators)
- You can delete a user (last column of the table). (Only administrators)
- You can change user's information by selecting the User name (First column of the table) (Create/Edit Assistant). (Only administrators, but assistants can only change their password and language)
