

# Frontend

The term **Frontend** is used to describe the administration module. The frontend is used by three types of users according to their roles sysadmin, administrator and assistant.

## Sysadmin (Synergy Systems)

Who will give you the authorization for using the frontend of hotspot solution, this is external user.

## Administrator (Frontend user)

Who will be responsible for your frontend with maximum access given by sysadmin. An administrator can create assistant and also another administrator.

## Assistant (Frontend user)

Who will also be responsible for your frontend with minimum access given by sysadmin. An assistant has no right to create any user (Administrator / Assistant).

## Frontend Component

By reading frontend component, You will know,

Module	Description
<a href="#">Client Module</a>	How to create, edit and manage your own information.
<a href="#">Location Module</a>	How to create, edit and manage your hotspots locations.
<a href="#">User Module</a>	How to create, edit and manage the accounts for your frontend users ( <a href="#">Keyword Definition</a> ).
<a href="#">Tariff Module</a>	How to create, edit and manage tariffs.
<a href="#">Account Module</a>	How to create, edit and manage the accounts for your hotspots users ( <a href="#">Keyword Definition</a> ).
<a href="#">Voucher Module</a>	How to create vouchers for your hotspots users.
<a href="#">Analysis Module</a>	How to observe the amount of usage data used by account(s) and voucher(s).

## Login

- To login into the administration frontend , please enter the appropriate url into the web browser navigation bar. It provides a secure gateway for logging in.
- Please give your username and password.

By clicking the header of a table, You can sort the rows of every table.
